Summary

Skilled software engineer with expertise in full-stack web development, specializing in the MERN stack (MongoDB, Express.js, React, Node.js). Strong proficiency in data structures and algorithms, with experience solving 100+ coding challenges. Proven ability to deliver high-quality projects and collaborate with cross-functional teams.

Education

Arjun College of Technology

Bachelor of Technology in Artificial Intelligence and Data Science(CGPA: 8.0)

Tamil Nadu,India
Sep 2023 - presentt

Experience(Internship)

AI/ML & Full Stack Intern — NIT Nagaland

June 2026 - July 2026

National Institute of Technology Nagaland

- Worked as an AI/ML & Full Stack Intern at NIT Nagaland, developing and deploying the ECE Excellence Hub website using modern web technologies and gaining practical experience in AI/ML and full-stack development.

AI Full Stack Engineer Intern

September 2026 - May 2027

NimbleX

- Contributed to the NimbleX learning platform, developing responsive and interactive web components using HTML, CSS, JavaScript, and JSON, with a focus on reusable UI and mobile responsiveness.

Technical Skills

Programming languages: Java, Python

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB

Data Structures and Algorithm: Proficient in DSA with problem-solving experience

Tools: Git and GitHub, VS code, Eclipse, Versel, Postman

Database Management: My SQL, Postgress SQL, MongoDB

Projects

Expense Tracker App

July 2026 - Aug 2026

JavaScript, React, Firebase

- Developed an expense tracking application to add, edit, delete, and categorize expenses with real-time data storage.
- Implemented expense summaries and transaction management with a responsive user interface.
- Integrated Firebase for database storage and user data management.

RAG Chatbot

Sep 2026 - Oct 2026

Python, Flask, RAG, OpenAI API

- Developed a Retrieval-Augmented Generation (RAG) chatbot that answers questions using information from uploaded documents.
- Implemented document processing, text extraction, retrieval, and AI-generated responses.
- Built a Flask-based backend and integrated an LLM API for contextual question answering.

Achievements

- Solved 100+ leetcode problems to improve Data Structures and Algorithms skills.
- NIT Nagaland Internship certificate for Artificial Intelligence and Machine Learning.
- Build and deployed multiple web development projects using HTML,CSS,JavaScript.
